

Implement User Authentication Module

Assigned to: Alice Johnson AJ

Due Date: 2024-08-15

Task Description

Develop and integrate the user authentication module, including registration, login, password reset, and session management. Ensure secure token handling and compliance with OAuth 2.0 standards. Implement multi-factor authentication for enhanced security. Conduct thorough testing for edge cases and potential vulnerabilities. Integrate with existing user database.

Great progress, Alice! Don't forget to review the JWT token refresh strategy.

Carol White Yesterday

@AliceJohnson Could you provide an update on the MFA integration? I need to finalize the frontend changes.

Alice Johnson 2 days ago

Starting development on the login endpoint. Will update after initial commit.
